Track Workers:
Steve Milward
Dave McClain
Dennis Bowie
Kevin Sach
Andrew Sach
Gordon Moser
Craig Griffin
Harry Voss
Tom Nance
Tom Reese

Our Winter projects:
1. Replace main line track with steel track,
2. Add north loop for inside return.

See the Track Superintendent article on page 3 for details. Please help with these projects.
SVLSRM Calendar

Feb. Work Days each weekend - Please help finish winter projects.
Feb. 10 Board Meeting 6:30 P.M. Rancho Cordova City Hall

Mar. 7 Public run day - 11 AM - 3 PM
Mar. 8 Public run day - 11 AM - 3 PM
Mar. 9 Board Meeting at 6:30 PM Community Board Room Rancho Cordova City Hall. Members welcome.
Mar. 21 Member WORK day - please help on club projects.
Mar. 22 Member RUN day - bring your train to run all day.

Apr. 4 Public run day - 11 AM - 3 PM
Apr. 5 Public run day - 11 AM - 3 PM
Apr. 13 Board Meeting at 6:30 PM Community Board Room Rancho Cordova City Hall. Members welcome.
Apr. 18 Member WORK day - please help on club projects.
Apr. 19 Member RUN day - bring your train to run all day.
Apr. 25 Kids Day in the Park 11AM-3PM

Please volunteer to support the club events.
How will you support SVLSRM this month?

Membership

by Barbara Rohrs

WELCOME NEW MEMBERS

Jerry Abreu, Granite Bay
Jeff Schnitzer, Winters
Judy Zagler, Antelope

DUES are past due
Please pay

Please complete a membership form noting changes. You can renew on-line or download form at svlsrm.org then send check or pay on-line.

Send forms to SVLS P.O. Box 273, Rancho Cordova, CA 95741

Board of Directors

(##) Ending year of term
President: Andy Berchelli (916) 752-6697 (21)
E-mail: president@svlsrm.org
Vice President: Dennis Gramith (916) 988-7884 (20)
E-mail: vicepresident@svlsrm.org
Secretary: Stephanie Huntingdale (916) 580-7377 (21)
E-mail: secretary@svlsrm.org
Treasurer: Alison Berry (916) 983-9712 (20)
E-mail: treasurer@svlsrm.org
Track Superintendent: Dennis Bowie (916) 337-9492 (20)
E-mail: tracksuper@svlsrm.org
Yardmaster: Richard Lutrel (925) 876-0375 (20)
E-mail: yardmaster@svlsrm.org
Trainmaster: Peter Welch (916) 838-4998 (21)
E-mail: trainmaster@svlsrm.org
Director1: Bill Yoder (916) 652-7113 (20)

Another installment of looking down the track…

Well here we are and the month of January is done, and we have made great strides on the replacement of the Main line. The weekend of the 4th and 5th we pulled up the old track and marked the location of the switch that will lead in to the inside loop, and started assembly of the steel track panels. We also started assembly of the aluminum panels for the inside loop.

The week end of the 11th and 12th, we had the help of Tom Reese (aka Back-Hoe Tom) with his help and equipment we were able to remove the old road bed and start laying a new road bed. We were able to get ground cloth down and the rock base in and tamped. On the 12th more aluminum panels were built.

The week end of 18th and 19th most of the new track for the main line was installed. Andy came out on the morning of the 19th and using the rail punch, Andy was able to punch the holes in the aluminum rail panels for, the U bolt rail joiners. Not much was done on the rest of Sunday, seeing that the SF49er’s were playing that day.

The weekend of the 25th and 26th will be finishing the switch on the main line for the inside loop. Also locking down the rail on the ties then adding ballast and tamping.

I would like to thank all that has helped so far and look forward to more new faces.

The winter track project is well underway with great weather for most of the weekends in January. It’s great to see members come out to help improve the facility. Besides replacing track, the leaves from all our beautiful shade trees are on the ground. Grabbing a rake and making a bundle disappear is really helpful. We continue to work on Saturdays and Tuesdays until March. I’ve been there on Sundays, too, with little help. I would like to see the inner loop in place by March. But we need bodies to move it along. All the track panels have been built. Just need to install track panels. The diamond is scheduled to be done by the second week of February.

The new addition to the club’s fleet of engines is a Pacific steam engine. It is currently getting new plumbing, injectors and a new burner. I encourage everyone who is steam qualified or wants to learn on steam to stay tuned. When the engine is done we will have training on how to operate it.

With one month before our season starts I already have several parties booked. This is a great source of revenue for the club and is an easy few hours to contribute to the club. If you would like to help out with parties contact me. I try to call all qualified crews to help. With enough help, crews usually only work one party a month.
Hello all, I’m back. For some inexplicable reason I was elected to serve another term on the SVLS Board of Directors. For those of you who voted for me, I’ll do my best to uphold your trust. For those who didn’t, I’ll work to earn your trust. If you didn’t vote, well, you’re stuck with me!

We started the new year with a really nice potluck and operating session. No sooner than we put the trains away, the annual track refurbishment and upgrades started in earnest. In just a few weekends a small but dedicated crew removed the mainline track between Hillview and Reverso. The right of way was excavated, new road base was installed and graded. Then newly built track panels were placed and tied together. By the time you read this most of this section of mainline should be completed. From there the track crews will turn their attention to the new inner loop track under construction closer to the bike path. Once completed, this loop will allow us to run trains within the confines of the fenced area. Particularly nice for parties and small groups. This installation won’t interfere with normal train operations, so we’re not racing the clock to get it completed. That said, we can ALWAYS use a helping hand out there. Not only on track, but lots of other areas too.

For those of you who have been out to help, many, many thanks! Another area that will see more changes is the G Scale track. The folks there are already working towards expanding their layout. These folks don’t waste time, and are dedicated to creating a first rate operating area. Off on the not too distant horizon is operating weekends for the public, run days for our members and our Spring meet. Lest I sound like a broken record (remember those?), I urge you to come and get involved! We’ll all benefit if more folks jump in to help.

Until then, I hope to see you on the rails.

Steve is presented with a book about Squirrels. Ask him about his fascination with the cute and furry animals.
The plan for an on-site locomotive storage building has encountered a bump in the road. The guidelines which I was following were for residential areas. Since nobody lives in the park, (except homeless, geese and bums), the park is considered to be commercial property with different rules dealing with building permits. We will have to get a permit to build our storage structure. I will start over with the same concept, and with the able assistance of Phil Huntingdale, develop acceptable plans to obtain the required permits. This will allow us to make a few changes from the original design to make the building slightly larger to better fit our needs.

I have been working on the trucks from the Union Pacific GP40. The trucks were originally equipped with needle bearings, which have been replaced at least once, and probably several times during the locomotives’ history. This time, I will install sealed ball bearings, which should last much longer. The needle bearings were not sealed, allowing all manner of water, dirt and other materials to enter, destroying the bearings. The below photos show some of the damage to the axle ends caused by failed needle bearings. Since the wheels are welded to the axles, and the axles are not center drilled, I had to dig out my lathes’ never yet used center rest. My plan is to center drill and machine the axle ends to get rid of the taper and damaged areas. I will then make sleeves to fit the new ball bearings and heat shrink them onto the axles.

Several G Scale steam train members were operating their locomotives and trains at the Train Show at Cal Expo the second weekend in January. Those entertained the public and answered many questions related to the hobby. Several people inquired about the SVLSM and planned to visit on one of the first weekend run days during the year. Some were asking about membership and who knows, some may join in.

We will start the Phase 2 G Scale build on the first weekend in February. We have scheduled drilling footing holes and installing the steel post with concrete footing on Saturday, February 1st weather permitting starting at 9:00 am. We could use help, come out, should be fun. The steel framework and HardieBacker Cement Board will follow with completion of track work by the spring meet. Volunteers will be needed to accomplish all of these tasks.

Hope to see you this month on a work day or in March for running trains. The weather should be warmer and dry.

Phil, Craig, Bob getting ground ready for poles to be added to the G-Gage.
SAFETY RULES FOR THE MONTH

1.09 Handcars
Handcars and other non-powered vehicles shall operate only at the discretion of the Trainmaster or a board member.

2.13 Duration of Inspection
Boiler tags or cards are valid for a period not to exceed 12 months from the date of issuance. Pressure tests for the purpose of tag or card shall be conducted under the supervision of an appointed member.

3.14 Approaching Stopped Trains
An engine approaching a stopped train on the same track must come to a complete stop no less than 50 feet from the stopped train. The stopped train may then be approached slowly with caution.

4.01 Qualifications of Crew
Trains hauling General Public must be operated by qualified Engineers and Conductors who are members of SVLSRM. All operating personnel, while on duty, shall have a copy of these operating rules in their possession or on the train. The Board of Directors may restrict or suspend from duty any operating personnel who consistently violate safety rules.

Qualifications/Restrictions of an SVLSRM Engineer
- 18 years of age or older.
- Member of SVLSRM in good standing.
- Passes a current Written Qualification test showing knowledge to operate specific locomotive (steam, diesel, etc.).
- Passes a current Practical Examine demonstrating the judgment and ability to competently operate specific locomotive (steam, diesel, etc.).

EXAMINATION FOR LOCOMOTIVE ENGINEERS.

THE following examination code is partly made up from the manuals in use for the examination of firemen on several of our most progressive railroads - from the *The Catskill Archive*. Any fireman who can give an intelligent answer to the greater part of these questions is likely to pass for promotion.

MANAGEMENT OF THE LOCOMOTIVE.

Q. 1.—How should a locomotive be started?
Q. 2.—After starting, how can an engine be worked most economically?
Q. 3.—What is meant by using steam expansively?
Q. 4.—Why is working the steam expansively considered desirable?
Q. 5.—How does hooking up the reverse lever increase the expansive working of steam?
Q. 6.—What is the valve-gear of a locomotive?
Q. 7.—What is the use of the valve-gear?
Q. 8.—By what means is the change of motion effected?

10 Years ago: The New Year's Day Run meant a lot to me and the track crew. We have done a lot of switch repair, point and rail replacement to be able to run the rail road in both directions. I want to thank Matt Mason for his effort and help to complete the One inch track in time for the run.

With all the wet weather, work has slowed down, but Paul Skidmore and Ben Klienwatcher have been able to dump more ballast on Sugar Pine and soon we will be able to level and complete this project. We now have a tractor, thanks to the trade made possible by Bill Butler and Brad Jones. This tractor has made track work a lot easier for those of us that are retired and Brad has the Tish back on the rails.

20 Years ago: The first work day of the year and century was a great success! A lot of willing hands and cooperative weather made it possible to do some of the work that needed attention.

Thanks to the following members who came out and helped:
- Carl Carlson, Curtis Bonville, Pam Naylor, Gordon Moser, Dick Esselbach, Jack Rickett, Milon Thorley, Keith Berry, Matt Mason, Don Yungling and Tony Rohrs.

30 Years ago: Making Steam - On Saturday, Jan. 20, some of our members assisted Superintendent Doug Fulton in cleaning of the track and inside area. We also repaired lawn mowers, bundled railroad ties and bagged track screws for the “Panel Track Project”. Those members who were there to help out were: John Bailie, Chris Donhost, Warren Wagner, Ken Willis, Vince Barto, Keith Berry, Doug Fulton, Brian Murray, Howard Shradar, Dennis Gramith, Henry Stefani, Amandus Draw, Lynn Wetter, Warren Sharr, Judy Gramith. There was a good turnout at the Unit Shop (approximately 14 people) on both Tuesday, Jan. 30, and Tuesday Feb. 6, of people to work on the Overfaire Engine. Several members took something home to work on in their own shops in their spare time. We are very pleased to see so many members taking an active part in this club project.

40 Years ago: A new passenger loading siding just outside the fence will be the club’s next objective, as investigation into the m/w storage building alternatives continues. No third rail is planned, but third rail will be relaid over the existing siding.

Milon Thorley, our own Commodore Vanderbilt, has bought himself another pike, namely the Folsom Railroad, from the Sherman brothers.
